Mission & Philosophy

Hodges University’s Center for Lifelong Learning (CLL) was established in 1996 by the University and local leaders as the first lifelong learning program in Collier County. The CLL provides quality year-round educational programs to adults in the community at a reasonable cost. The CLL is a member-directed, multigenerational learning community that invites participants to experience diverse, collaborative, life-enhancing intellectual and social activities. The broad based curriculum includes stimulating discussion groups, lectures, field trips and workshops in current events, the arts, literature, economics, the environment, health and wellness, philosophy and spirituality, creative writing and much more. An affiliate of Elderhostel, the CLL is part of a national network of lifelong learning institutes.

The Frances Pew Hayes Center for Lifelong Learning at Hodges University

Frances Pew Hayes was a wife, mother and woman with diverse interests only outmatched by the measure of her goodwill. Ms. Hayes has been a pioneering force of philanthropy in our community, which continues to benefit lives through the work of such institutions as The Education Foundation of Collier County, The Conservancy of Southwest Florida, The Naples Philharmonic Center for The Arts, Moorings Park, Youth Haven, and Hodges University where she was heralded as The Humanitarian of the Year in 2002. To celebrate and honor the extraordinary life and legacy of this Neapolitan icon, Hodges University has established the Frances Pew Hayes Center for Lifelong Learning at Hodges University. Mrs. Hayes’ passion for people, community stewardship, and leadership in initiatives involving healthcare, the arts, education and care for older adults will forever resonate among the values fostered in the Frances Pew Hayes Center for Lifelong Learning.

Members not only attend and participate in the programs, but also help to plan them.

**The Tamiami Trail**

One of the most well traveled roads in Southwest Florida is the Tamiami Trail. Conceived by the Florida Legislature in 1912 as a way to link Florida’s main coastal communities on both the east and west coasts, construction did not begin until 1915. The “Tamiami” project, as it was originally known, was plagued with political and economic setbacks. It was widely believed that the section traversing the Everglades could not be built. Without Barron Collier’s leadership and determination the Trail may have languished for many years. Finally completed in April of 1928, the road opened vast areas of southwest Florida for development.

EUROPEAN EXPLORERS OF FLORIDA 1513 TO 1645

For the next 50 years, Florida served as a starting off point for several major exploratory expeditions by French, Spanish, and English adventurers. The stories of these ill-fated excursions reveal a world of sophisticated Native cultures that could not survive the onslaught of introduced disease and slave-raiding that began with the Europeans’ arrival. In addition to the above lecture there will be time for exploration of this wonderful museum, the museum’s five-acre botanical park, and the orchid house. **Teaching Virtue to Children: Who? How? And What?**

The Florida State Legislature passed a law in 2003 requiring that public schools have a character education program for all grade levels, Pre-K thru 12, that is secular in nature and that emphasizes certain qualities, such as Respect, Responsibility, Honesty, etc. What should such a “program” offer? How should these qualities, or “virtues,” be defined, and how should they be taught? Who should do the teaching? This workshop examines several character education programs, their theoretical basis, and results of research that has been conducted in this area. This course is designed especially for individuals who wish to promote positive character development in children, who wish to engage in more effective classroom management, and who wish to contribute to the moral fabric of the community by effectively teaching “good” character to tomorrow’s business leaders, employees, and citizens. The focal point of our discussion will be the “Circle of Excellence” and other programs currently utilized in Collier County Public Schools.

What made Lincoln great? What was it about him that struck those who knew him? This course explores these questions with the help of an authority who, in his own words, has "spent many years trying to get to know this man from afar," and in doing so has become one of the country's most distinguished Lincoln scholars and an award-winning author for his books about Lincoln. For Lincoln buffs and those simply wishing to know him much better, this course opens a compelling view into his thinking and career. In addition to asking what it was like to know Lincoln, Professor Guelzo explores three themes: What ideas were at the core of his understanding of American politics? Why did he oppose slavery, and what propelled him, in the 1850s, into the open opposition to slavery that led to his election to the presidency in 1860? What particular gifts equipped Lincoln to lead the nation through the "fiery trial" of the Civil War?

THANK YOU
The Center for Lifelong Learning would like to thank all of the volunteer instructors that work hard to make the CLL such a wonderful program for individuals in our community. Without their dedication, enthusiasm, giving spirit and expertise the Center for Lifelong Learning could not provide the premier programming that is offered. It is with great appreciation that we acknowledge the giving of their time, talents, and expertise. We thank you!
